PROFILE

Information Technology student with a strong interest in Software Testing and Quality Assurance. Proficient in Java and familiar with Python and C++. Hands-on experience in manual testing and test automation using Selenium WebDriver and TestNG. Passionate about understanding testing principles and applying real-world testing practices through self-driven projects. Currently expanding my knowledge in API testing with REST Assured, CI/CD with GitHub Actions, and containerized testing environments using Docker.

TECHNICAL SKILLS

Programming Languages

- Java
- Python
- C++

Software Testing

- Manual Testing
- Test Case Design
- Test Scenario Design
- Test Reporting & Defect Logging
- Black-Box Testing Techniques
- SDLC & STLC

Automation Testing

- Selenium WebDriver
- TestNG

Tools

- Git
- GitHub
- Postman
- Eclipse IDE
- Maven

Concepts

- Object-Oriented Programming
- Data Structures
- Version Control
- CI/CD Fundamentals

PROJECTS

Manual Testing Project – Guru99 Banking Demo Site

- Analyzed requirements of the Guru99 demo banking application and identified test scenarios.
- Designed and executed manual test cases covering functional, negative, and boundary testing.
- Reported defects with clear steps to reproduce, expected results, and actual results.
- Verified login functionality, customer management, and transaction workflows.
- Applied Black-box testing techniques and practiced STLC phases in a real testing environment.
- <https://github.com/Ahmsybu/GURU99.git>

Selenium Test Automation Framework (Ongoing)

- Developing a test automation framework using Java, Selenium WebDriver, and TestNG.
- Applying software testing principles to analyze applications, identify requirements, and design test scenarios before implementation.
- Writing maintainable automated tests while exploring best practices in test design and framework organization.
- Using Git for version control and experimenting with GitHub Actions for continuous integration.
- Exploring Docker to create reproducible and maintainable testing environments.
- Continuously integrating newly learned concepts and technologies to simulate real-world QA workflows.
- <https://github.com/Ahmsybu/hands-on-selenium-webdriver-java.git>

Smart Agriculture Management System – DEPI Mega Project

- Led the testing activities for a Smart Agriculture Management System developed during the DEPI Software Testing Track.
- Designed and executed manual test scenarios and test cases based on project requirements.
- Performed defect reporting and documented test results.
- Developed automated UI tests using Java, Selenium WebDriver, and TestNG.
- Conducted API testing using Postman to validate endpoints and responses.
- Collaborated with team members to improve software quality and ensure system reliability.
- <https://github.com/Ahmsybu/NXT-Smart-Agriculture-Management.git>
-

EDUCATION

Bachelor of Information Technology

Expected Graduation: 2028

CERTIFICATIONS

- DEPI Graduate – Software Testing Track

CURRENTLY LEARNING

- REST Assured for API Test Automation
- GitHub Actions for Continuous Integration
- Docker for Containerized Testing Environments

LANGUAGES

- Arabic: Native | English: Professional Working Proficiency
